

Tesina final de carrera

Eduardo M. Bringa
ebringa@yahoo.com

CONICET

FI, Universidad de
Mendoza, Argentina

FING, Universidad
Nacional de Cuyo
Mendoza, Argentina

<https://sites.google.com/site/simafweb>

Funding:

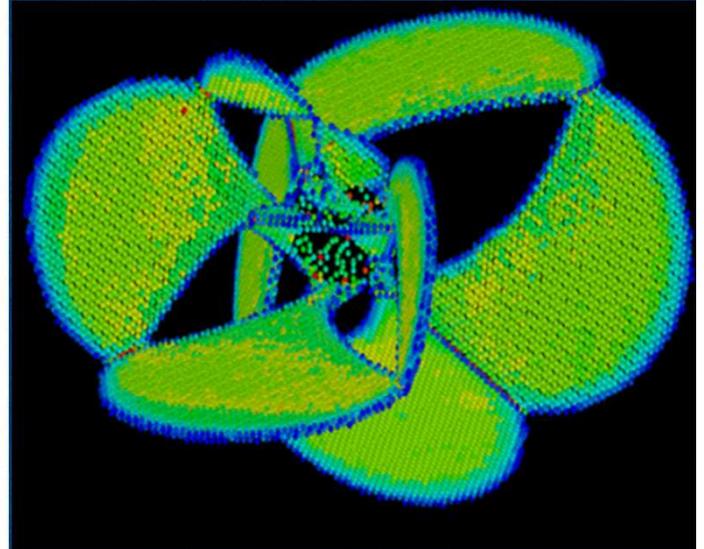

Agencia CyT, Argentina

FING, U Mendoza

SIIP, UN Cuyo

Introduction

FING-UNCUYO

<https://meet.jit.si/TesinaFinal-FING-UNCU>

SiMAF

Investigación y docencia: direcciones y subsidios

4 tesinas finalizadas + 1 en curso, 5 doctorados finalizados + 4 en curso

BARILOCHE, ARG.
Comportamiento de clusters en plasmas

LIVERMORE, CA
Lásers, tokamaks,
nanotecnología,
rayos cósmicos.

UVa, CHARLOTTESVILLE
Iones bombardeando superficies,
viento solar bombardeando Europa
(luna de Júpiter). **DOCENCIA**

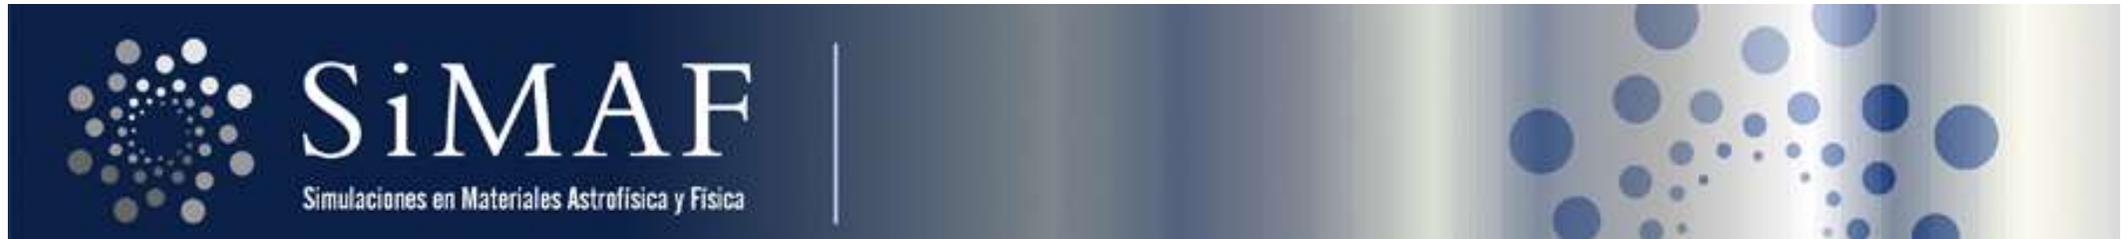

U DE MENDOZA, UN CUYO, ARG
Nanotecnología, condiciones extremas
de presión y temperatura, radiación, etc.
DOCENCIA

Máquina	CPUs
<u>IB (1995)</u>	
386	1
<u>UVa (2000)</u>	
T3E	256
<u>LLNL (2007)</u>	
Atlas	9000
BGL	213000
<u>NERSC (2006-2008)</u>	
Seaborg	6900
Franklin	19320
<u>UNCuyo (2008)</u>	
ITU	24
<u>SNCAD (2019)</u>	
TOKO	350

E.M. Bringa's group: Simulations in Materials Science, Astrophysics, and Physics

<https://sites.google.com/site/simafweb>

Expertise in molecular dynamics (MD), granular mechanics, Monte Carlo (MC), and high performance computing (HPC) in general.

More than 10 papers published per year in international journals.

2 researchers, 1 postdoc, 3 Ph.D. students, 2 undergraduate students, “visiting” students

Researchers: D. Tramontina (mechanical properties, organic materials, irradiation) y G. Dos Santos (magnetism)

Postdoctoral Researcher: B. Planes (granular mechanics for astrophysics),

Graduate students: G. Mora (nanoscale thermal conduction), G. Garcia Vidable (nanodiamonds), O. Deluigi (Fe phase transitions and HEA).

Undergraduate students: F. Aquistapace (Machine Learning, Defects), Federico Cartellone (HEA)

Reviews for thesis, scientific papers and projects from Argentina and abroad

E.M. Bringa's group: Simulations in Materials Science, Astrophysics, and Physics

SiMAF

Simulaciones en Materiales Astrofísica y Física

Expertise in molecular dynamics (MD), granular mechanics, Monte Carlo (MC), and high performance computing (HPC) in general

Research activity in last 5 years:

Nano-science:

Mechanical and thermal properties of materials under extreme conditions. Magnetism.

Materials at high pressures:

Strength, plasticity, phase transformations.

Radiation damage and astrophysics:

Materials for GenIV and fusion reactors, cosmic rays, interstellar and solar grains.

Granular mechanics:

Cohesive grains, with dissipative dynamics. Collisions, cratering, fracture, densification.

Ecosystem modeling:

Ecosystem networks, plant distribution.

Software development:

Open-source codes, including some work on Machine Learning.

Active collaborations & joint funding with groups in Argentina, USA, EU and LatAm

Tesina

Tesina-PROGRAMA-2023.pdf disponible en:

<https://aulaabierta.ingenieria.uncuyo.edu.ar/course/view.php?id=1883>

Plataforma (para consultas virtuales): *Jitsi*

<https://meet.jit.si/TesinaFinal-FING-UNCU>

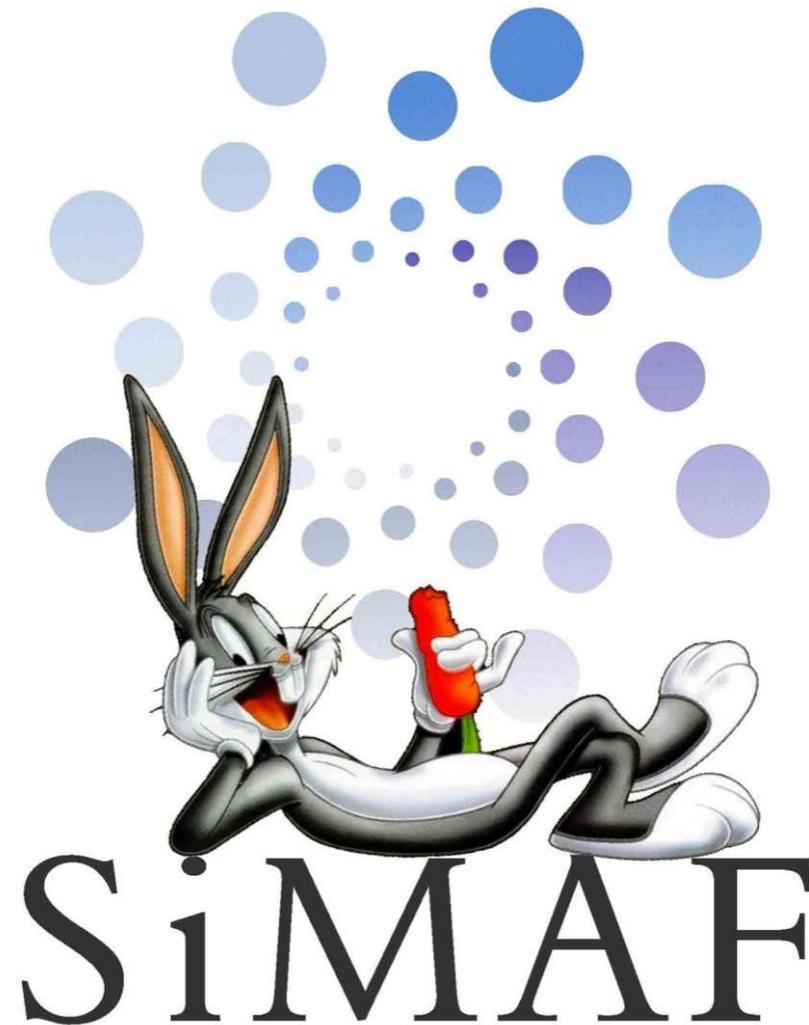

Feel free to suggest course material based on your specific needs

Contact: e-mail and WhatsApp chat

Outline

- **Introduction to the Scientific Method.**
- **Scientific “system”.**
- **Presenting scientific results in publications and meetings.**
- **Thesis planning**
- **Thesis writing.**
- **Thesis defense.**

That's all folks!!

Simulations in Materials Science, Astrophysics,
and Physics
