EL AGUA EN EL DISEÑO DEL PAISAJE I

El agua es uno de los elementos que más belleza otorga a la naturaleza.

Su fluidez y movimiento hace que nos quedemos embelesados durante minutos observando su curso.

En este sentido, son muchos los lugares del mundo donde el agua es el protagonista, que no serían lo mismo sin ella, la sustancia más importante sobre la Tierra.

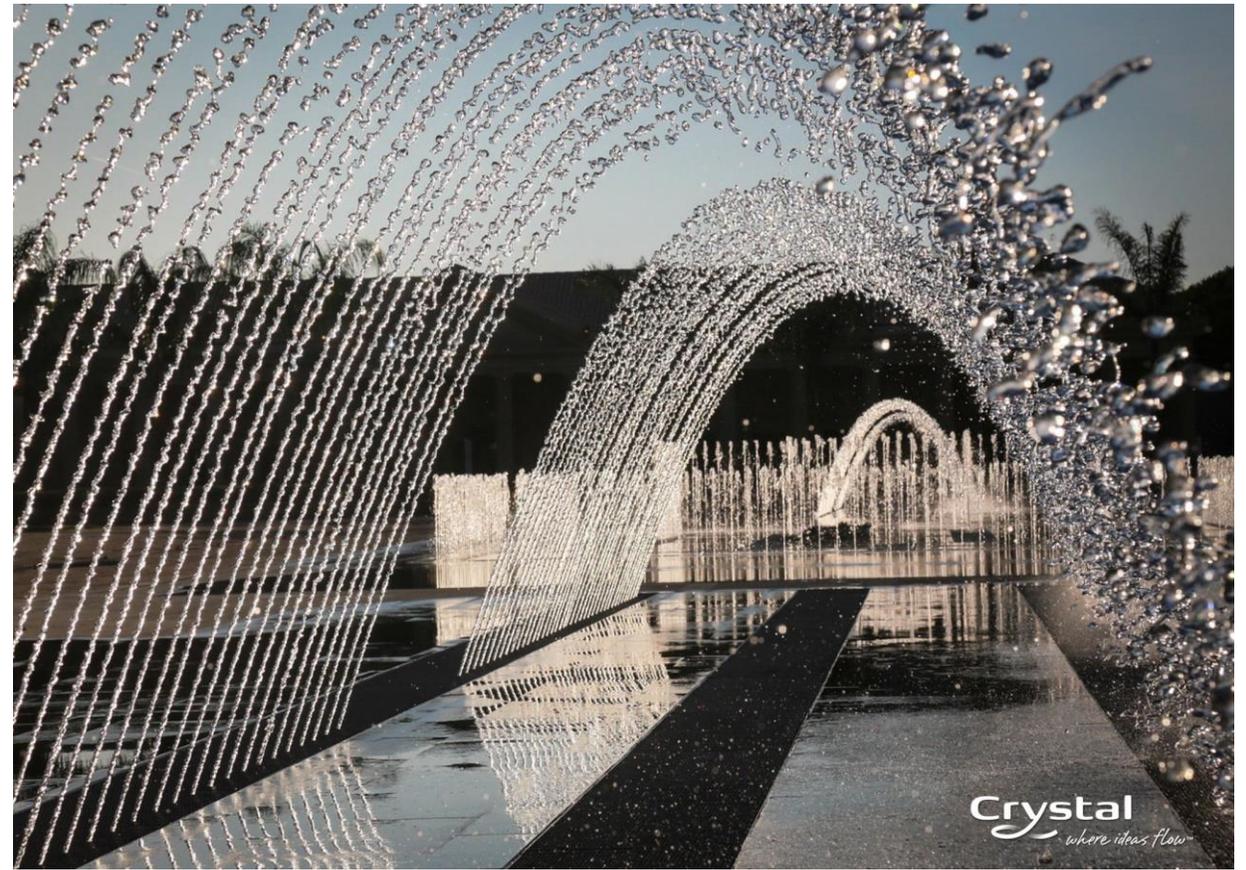

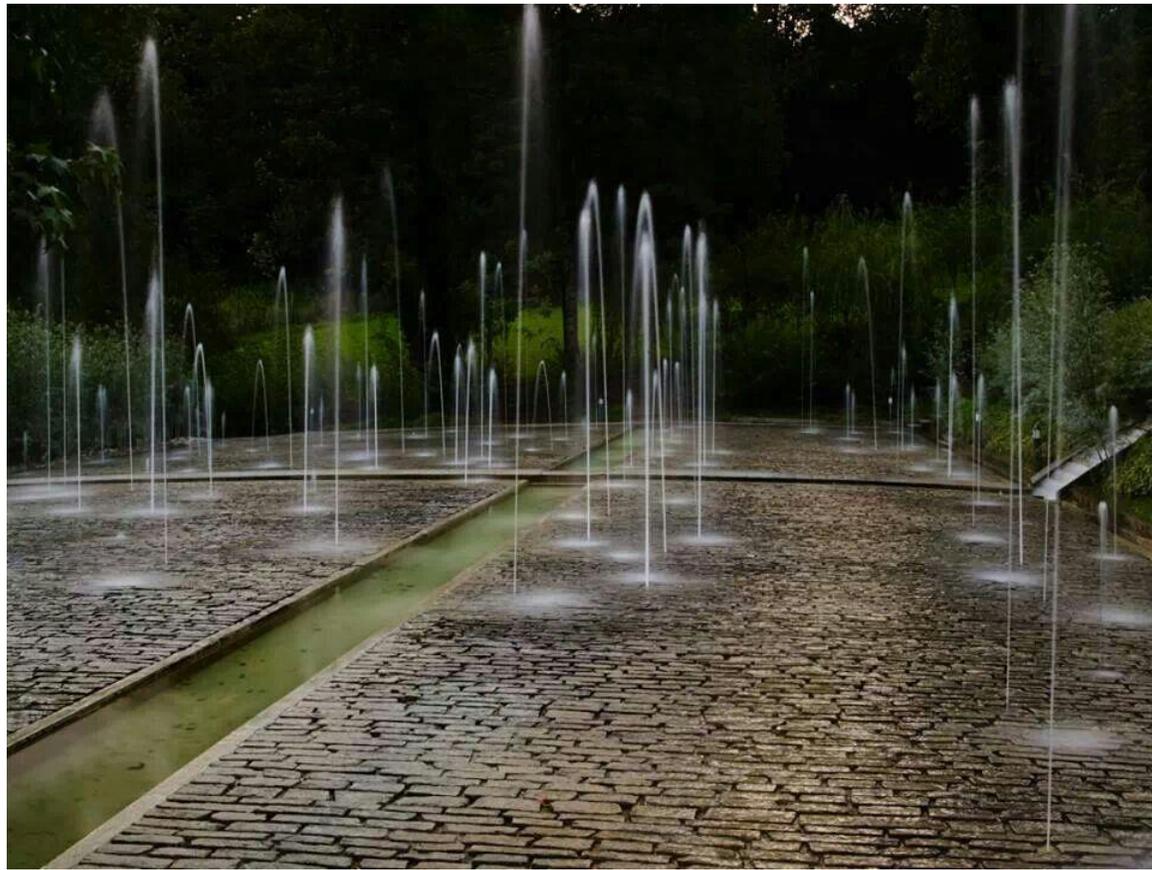

Sin duda, la importancia del agua para vida es mayúscula (sin ella no habría vida).

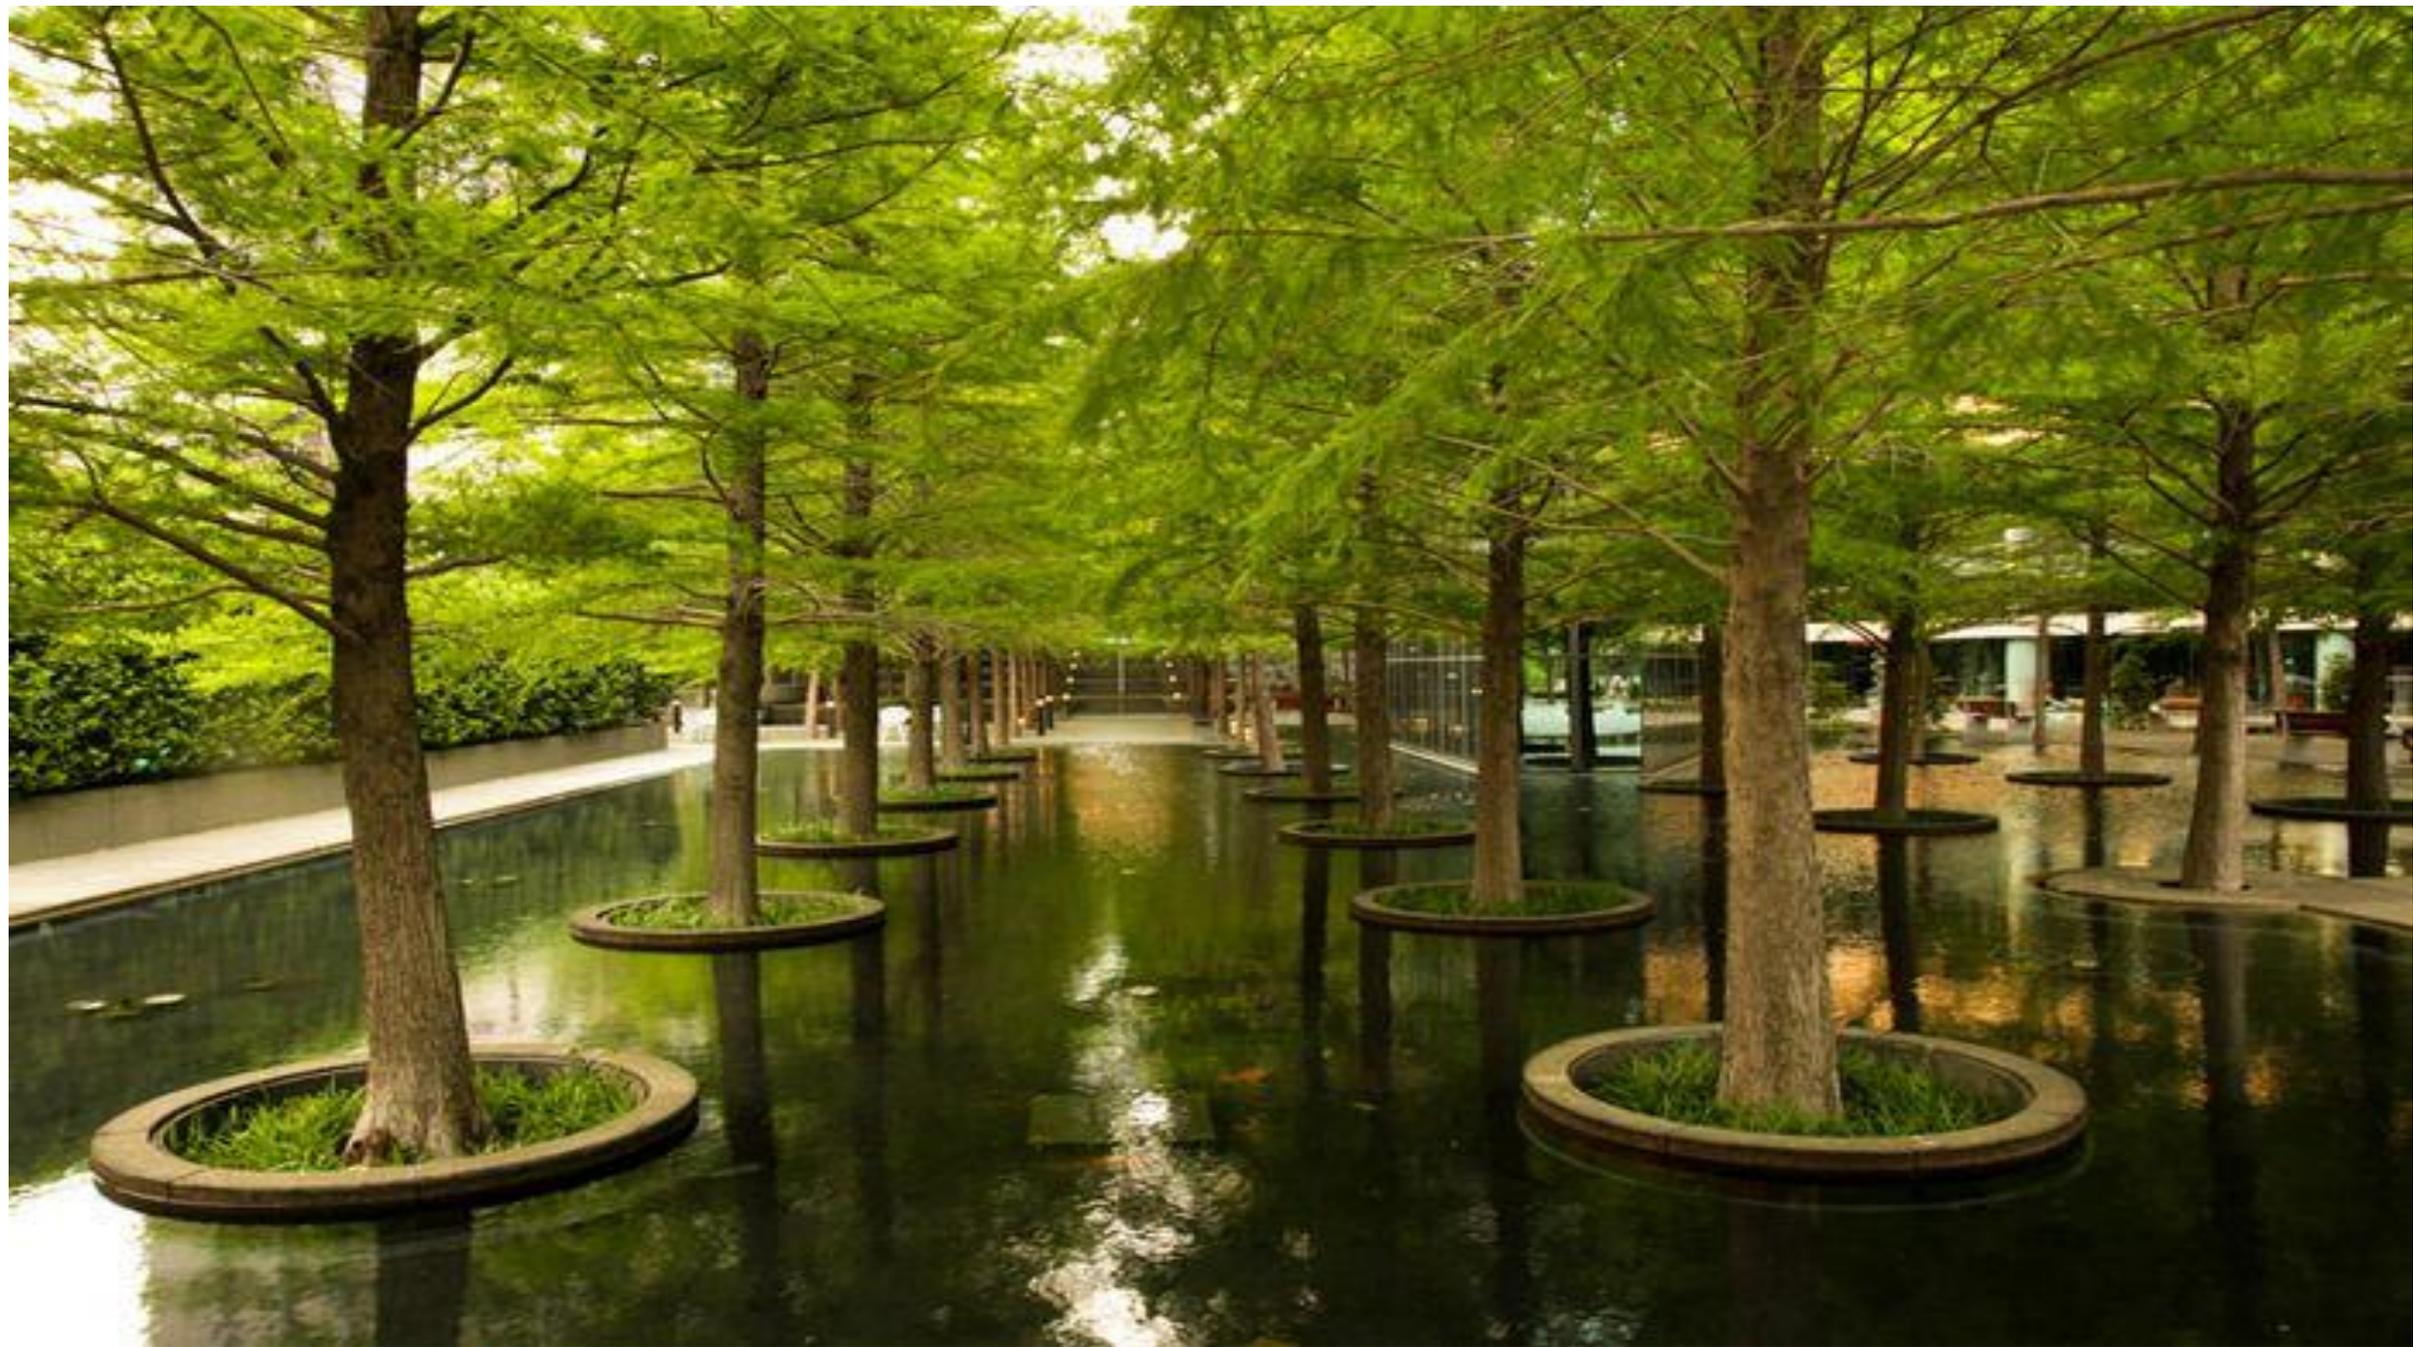

OPTAR POR LA PRESENCIA DEL AGUA EN NUESTRO PAISAJE ES FUNDAMENTAL PARA EL DESCANSO Y LA DISTRACCIÓN QUE UNO BUSCA EN UN RESTAURANTE.

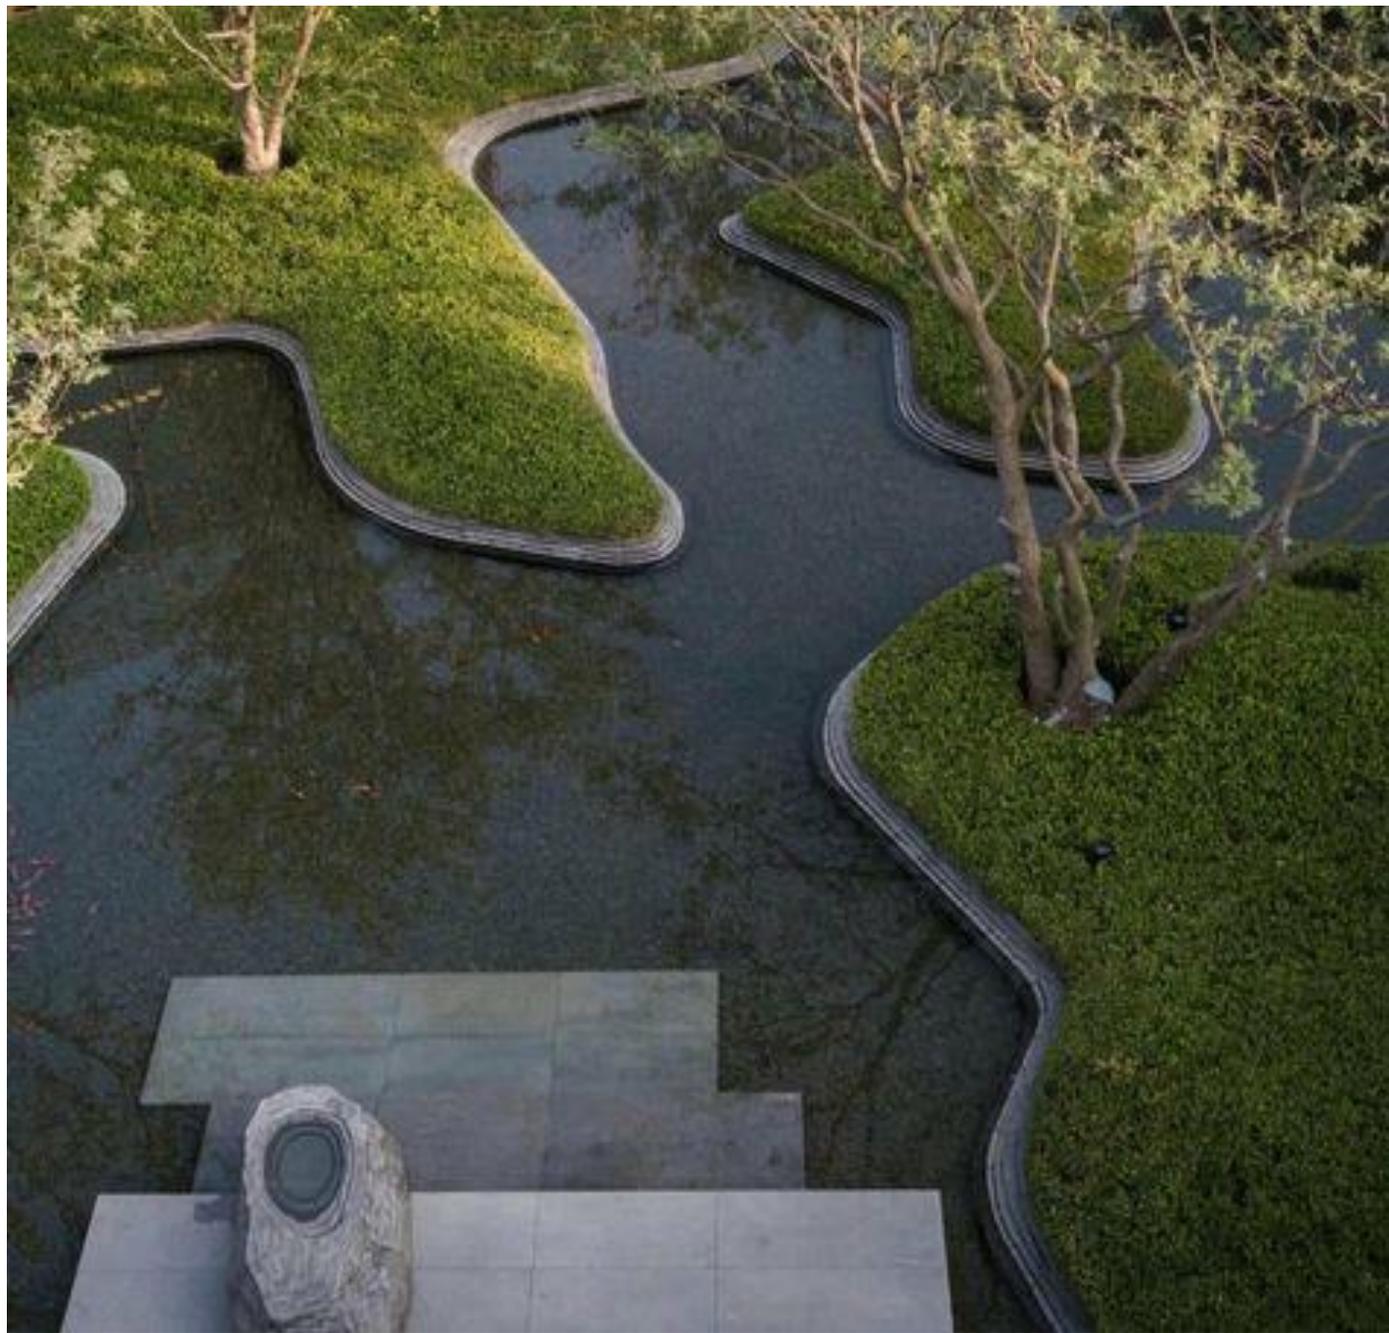

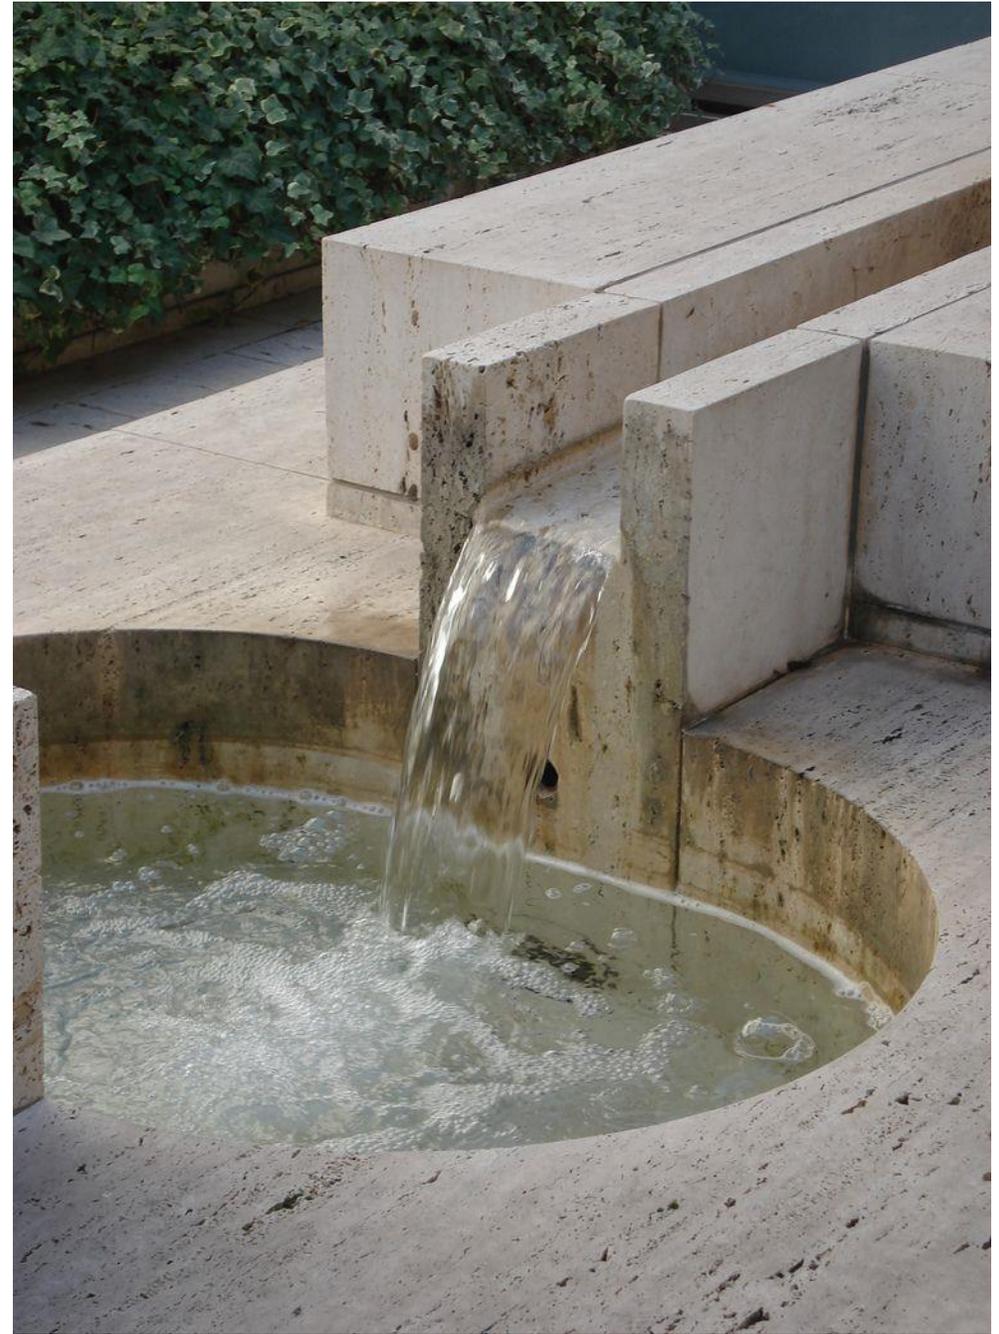

WE ARE ALL IN THIS TOGETHER

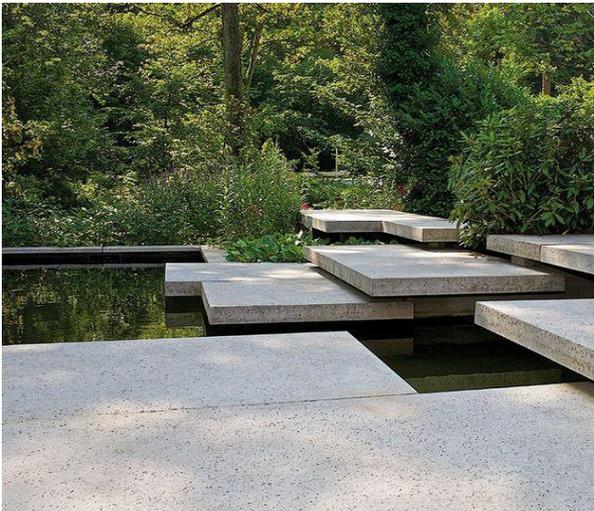

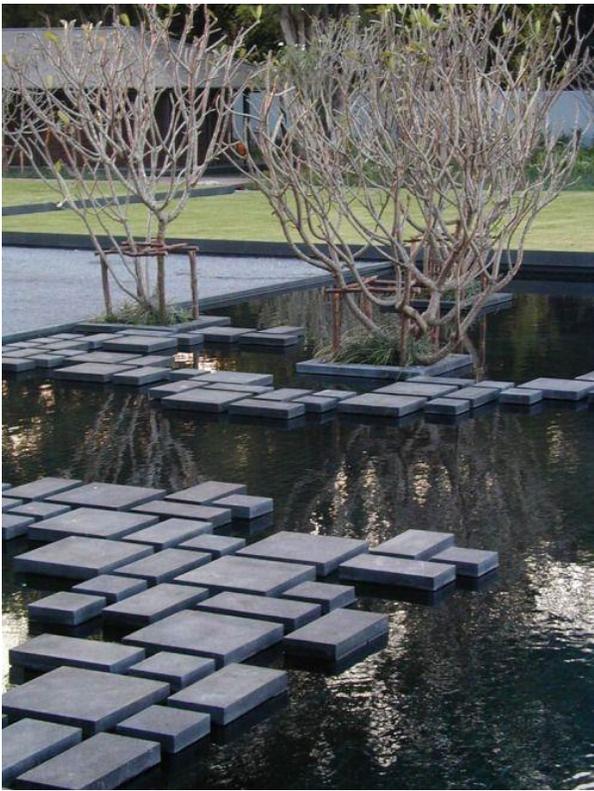

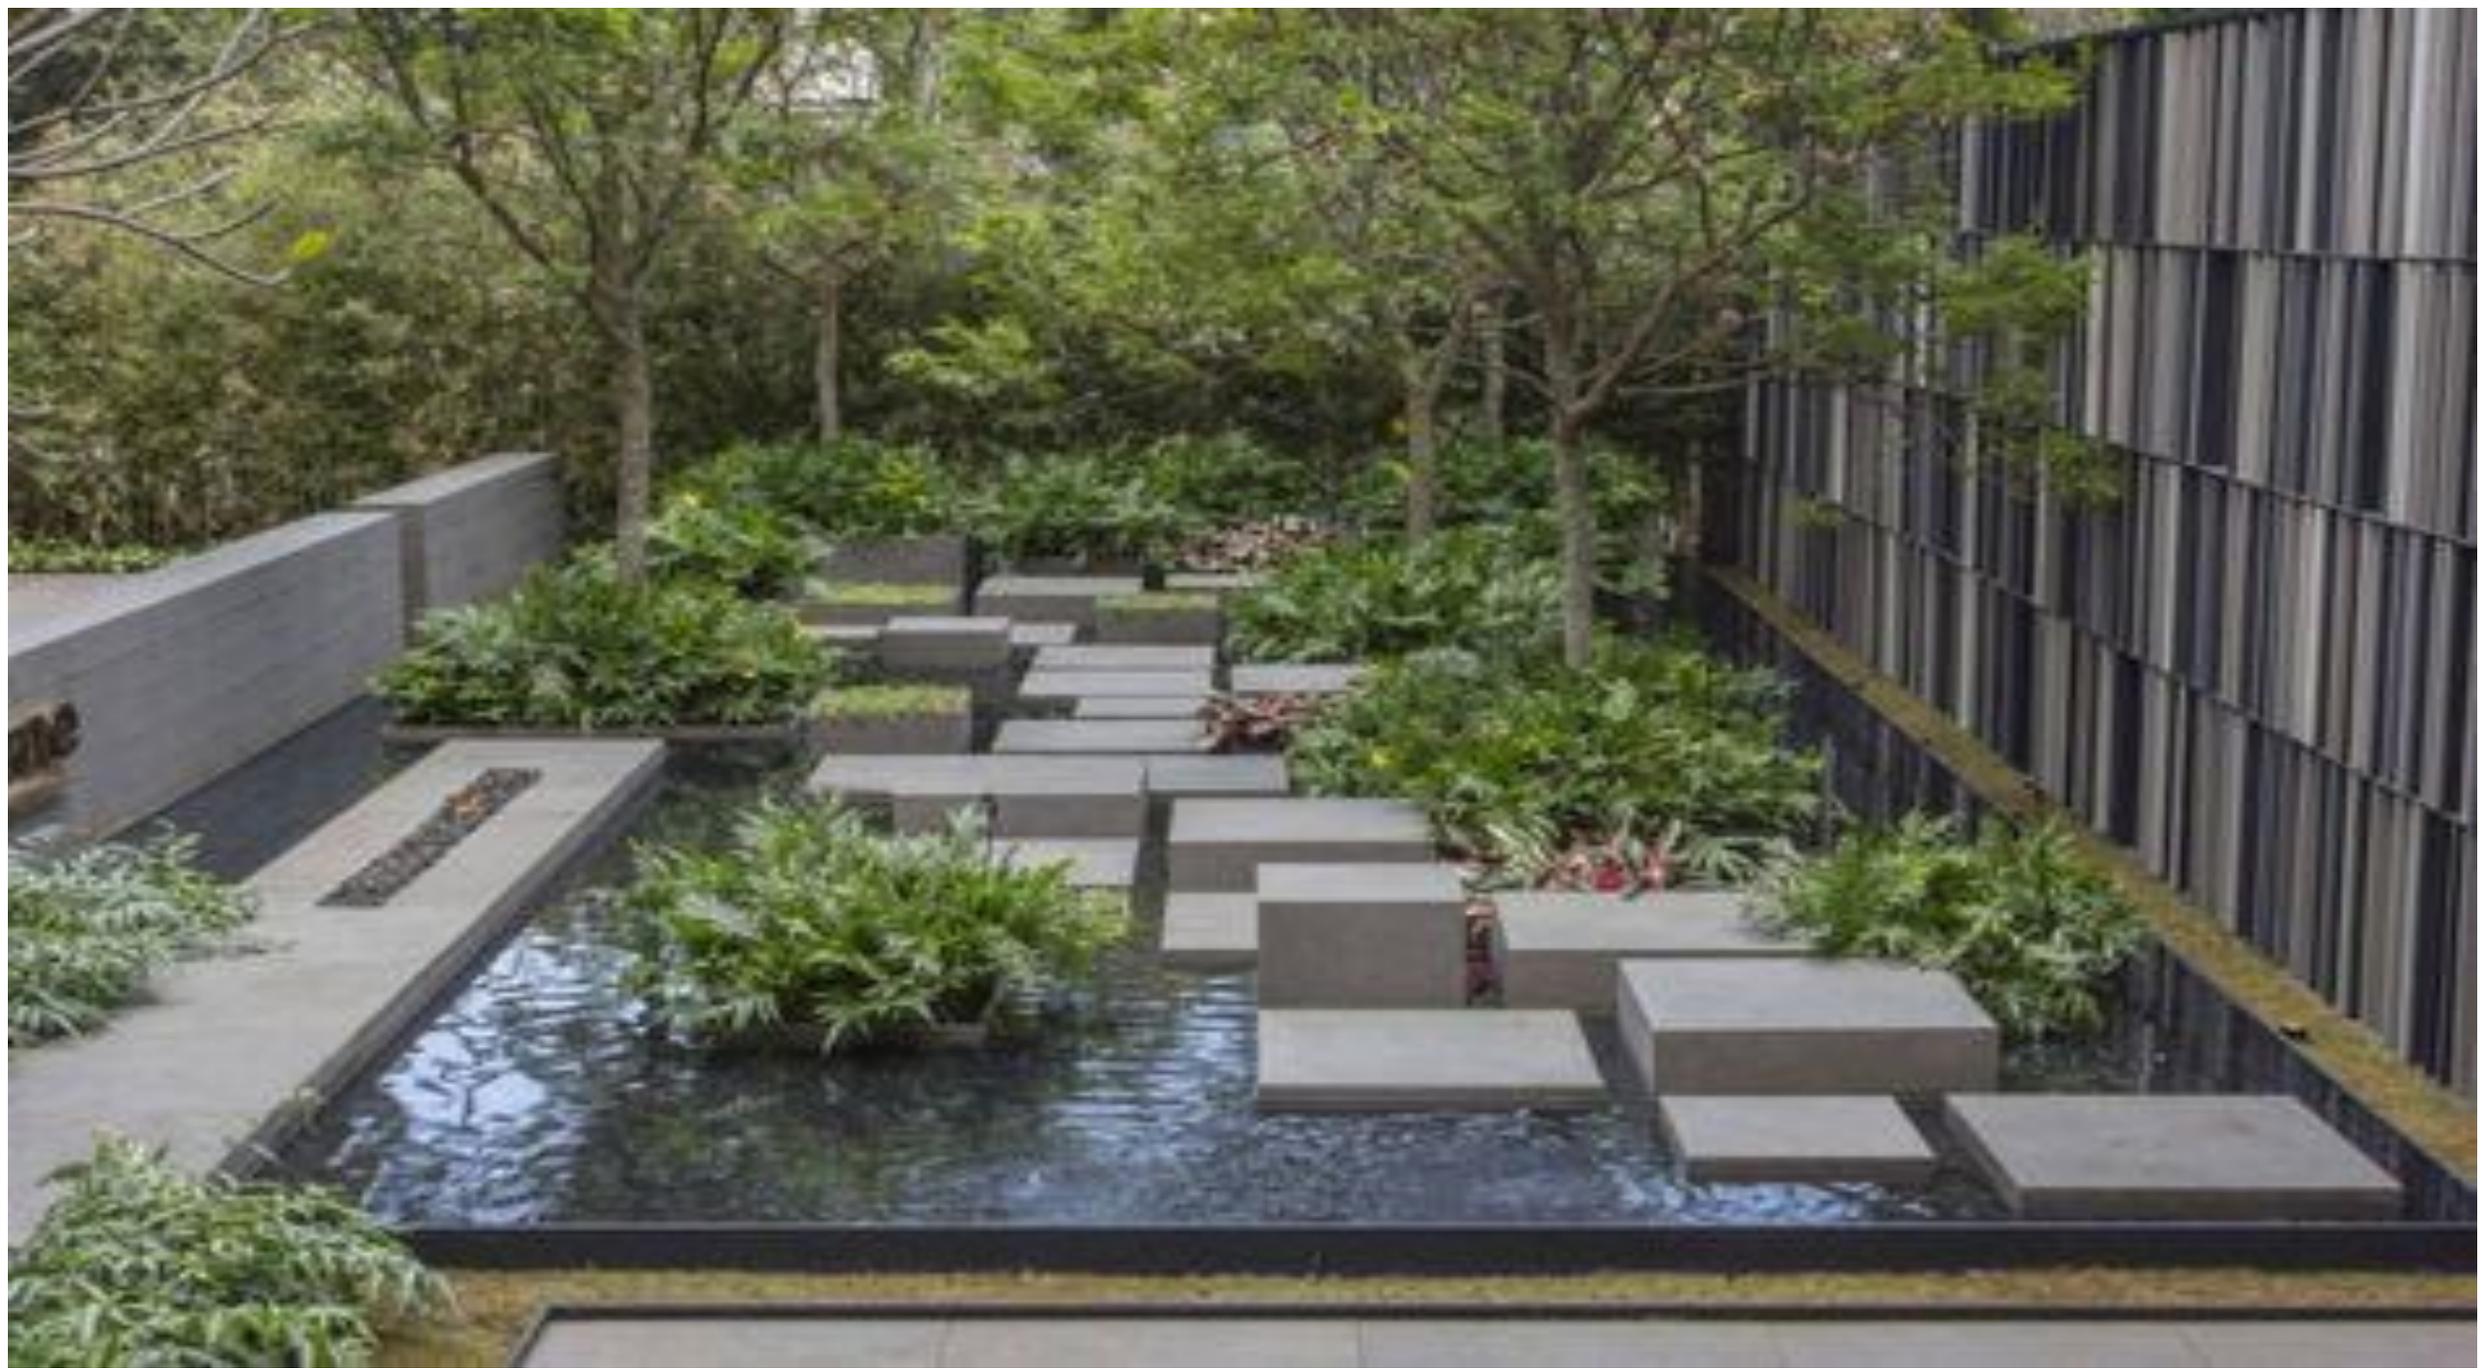

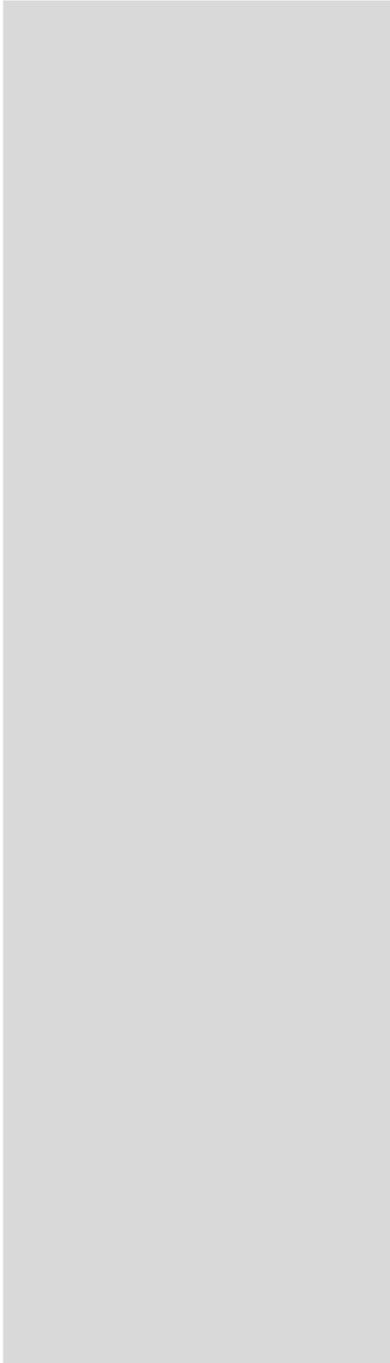

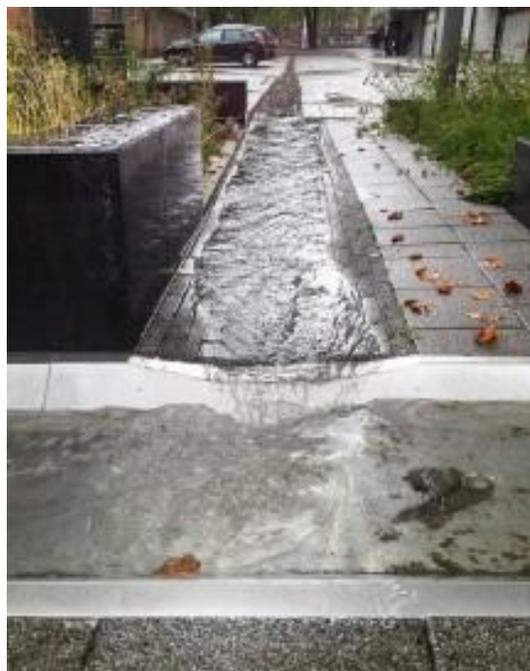

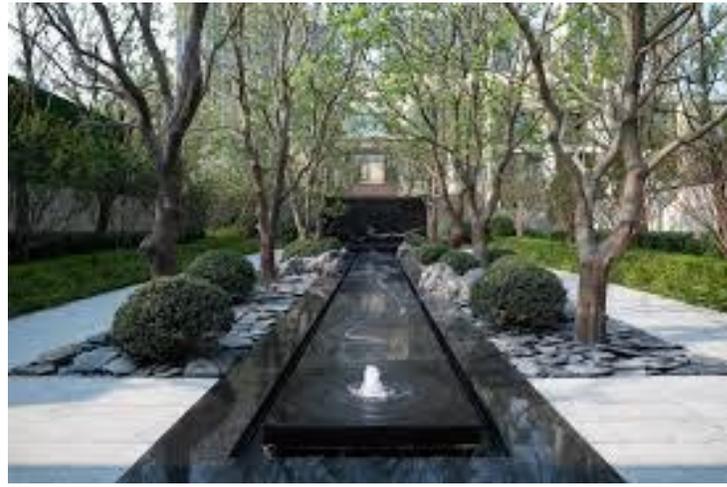

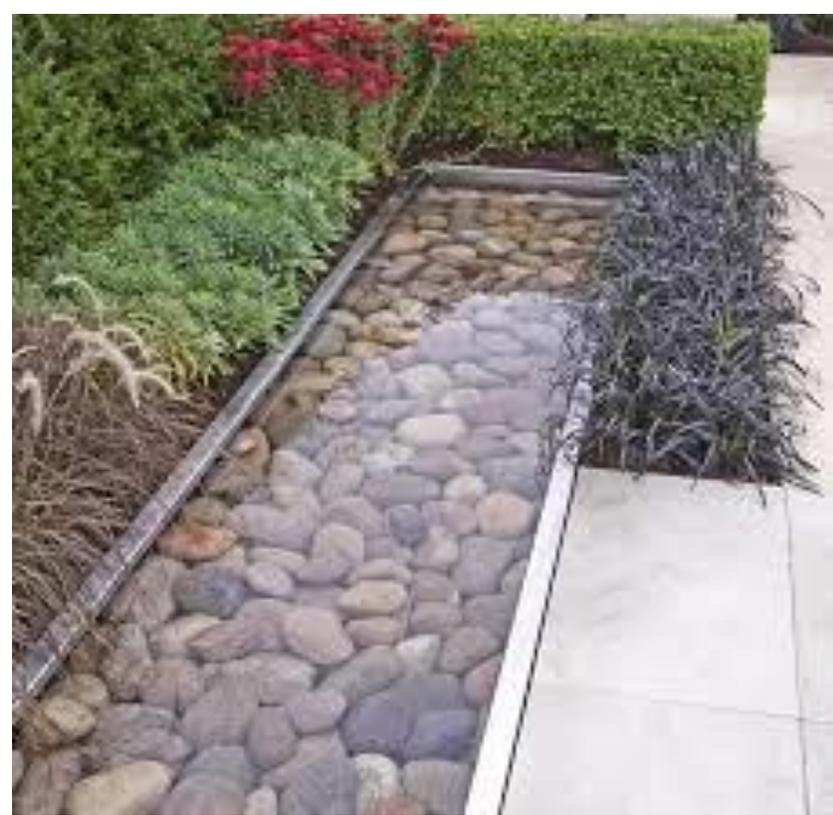

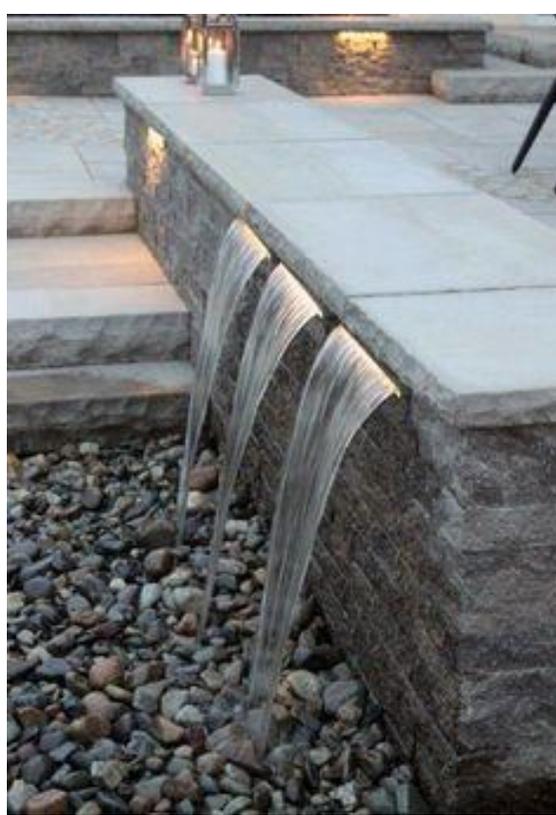

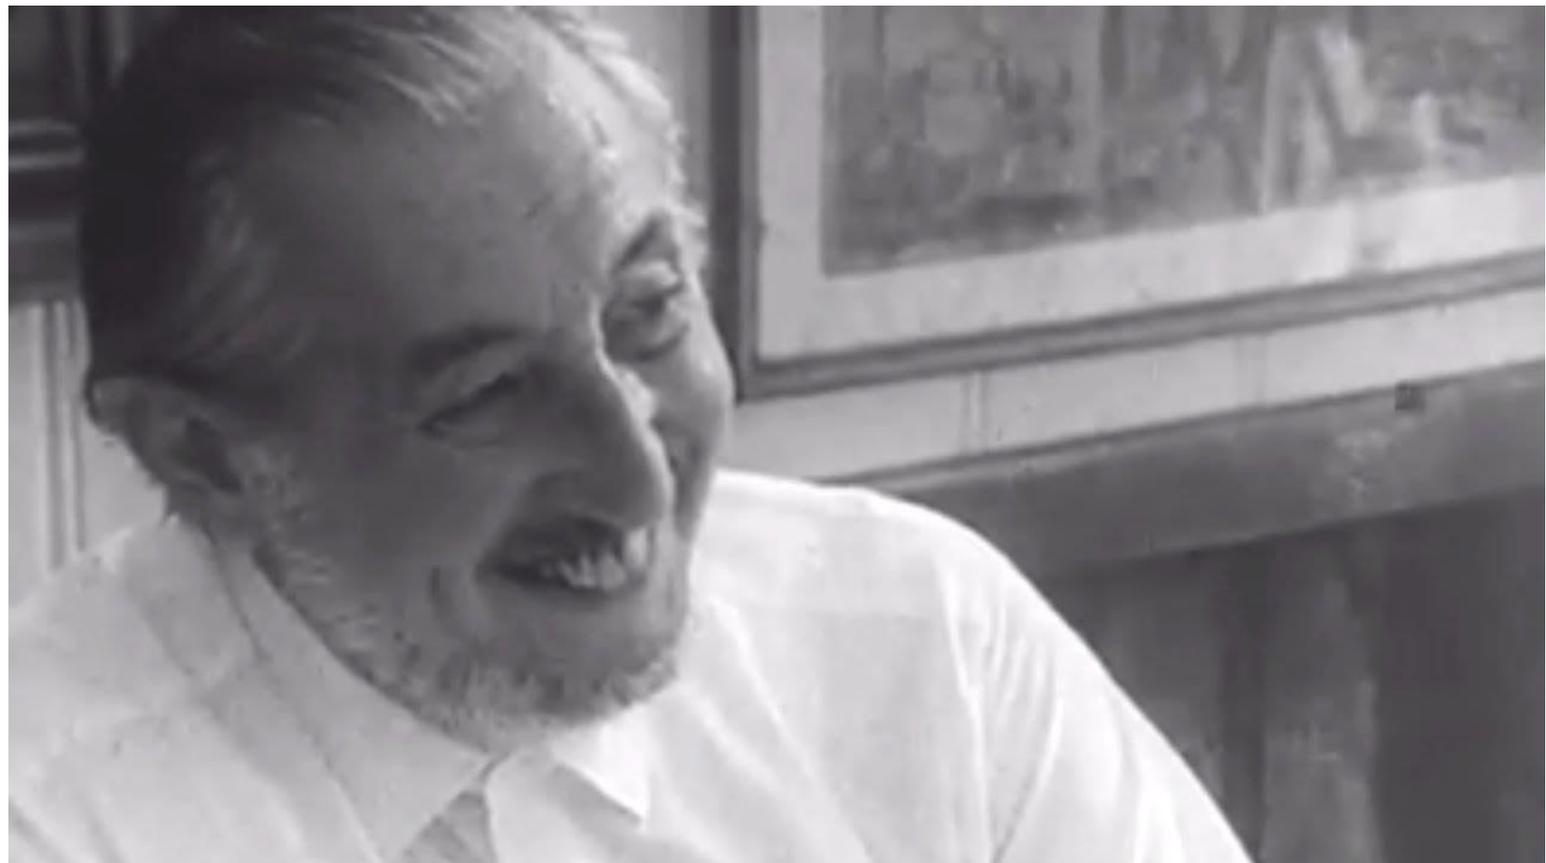

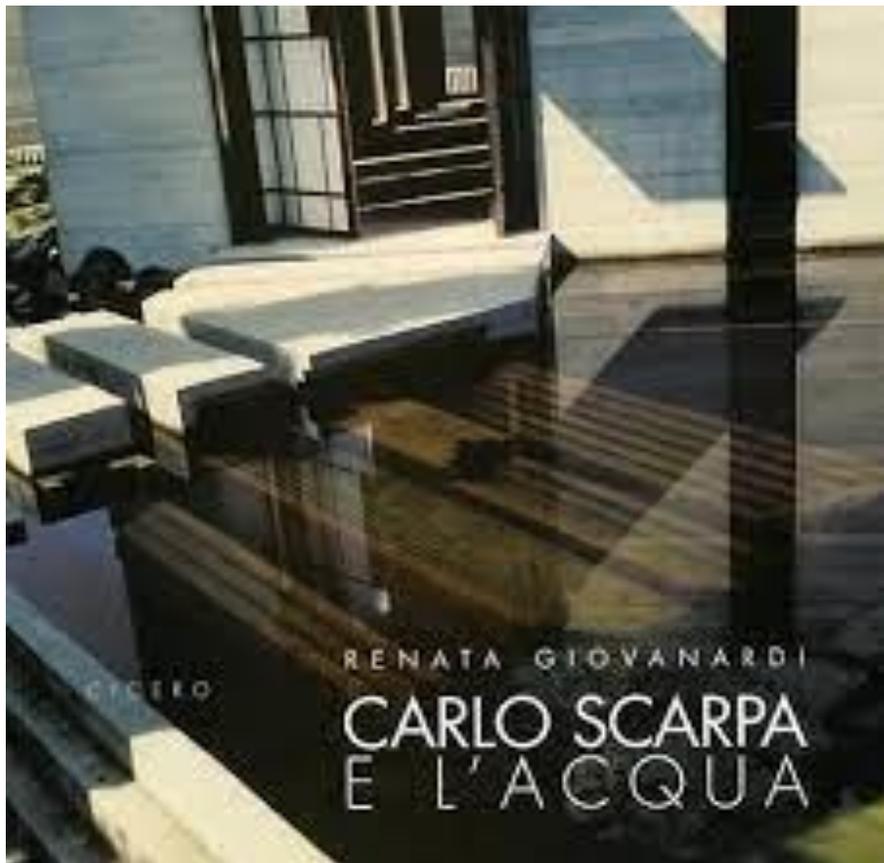

EL AGUA PARA CARLO SCARPA
