

# COMPOSICIONES CON CÍRCULOS

INVITATION

FORM FILM

Form film is a type of plastic film that is used in a variety of applications, including packaging, construction, and agriculture. It is typically made from polyethylene or polypropylene and is characterized by its flexibility and durability. Form film is often used to create protective covers for buildings, vehicles, and machinery, as well as to create packaging for sensitive materials. It is also used in agriculture to create greenhouses and to protect crops from frost and other weather conditions.
